

2023ce CELEBRATES THE "GREAT TURNING @ROUND!"

BIENVENIDO!

WELCOME!

The Universe Story Calendar.org

THE "GREAT TURNING @ROUND!" This year each Individual Human Being is invited to the "Great Turning @round!" to face the future wisely. If we humans keep backing into the future, the past will take our energy. As The Universe Story turns thirty (1992-2022ce) and the Calendar(TUSC) five (2017-2022ce) 2023ce is an appropriate year for each member of our subspecies of *Homo sapiens creator* to become consciously self-aware of our roles.

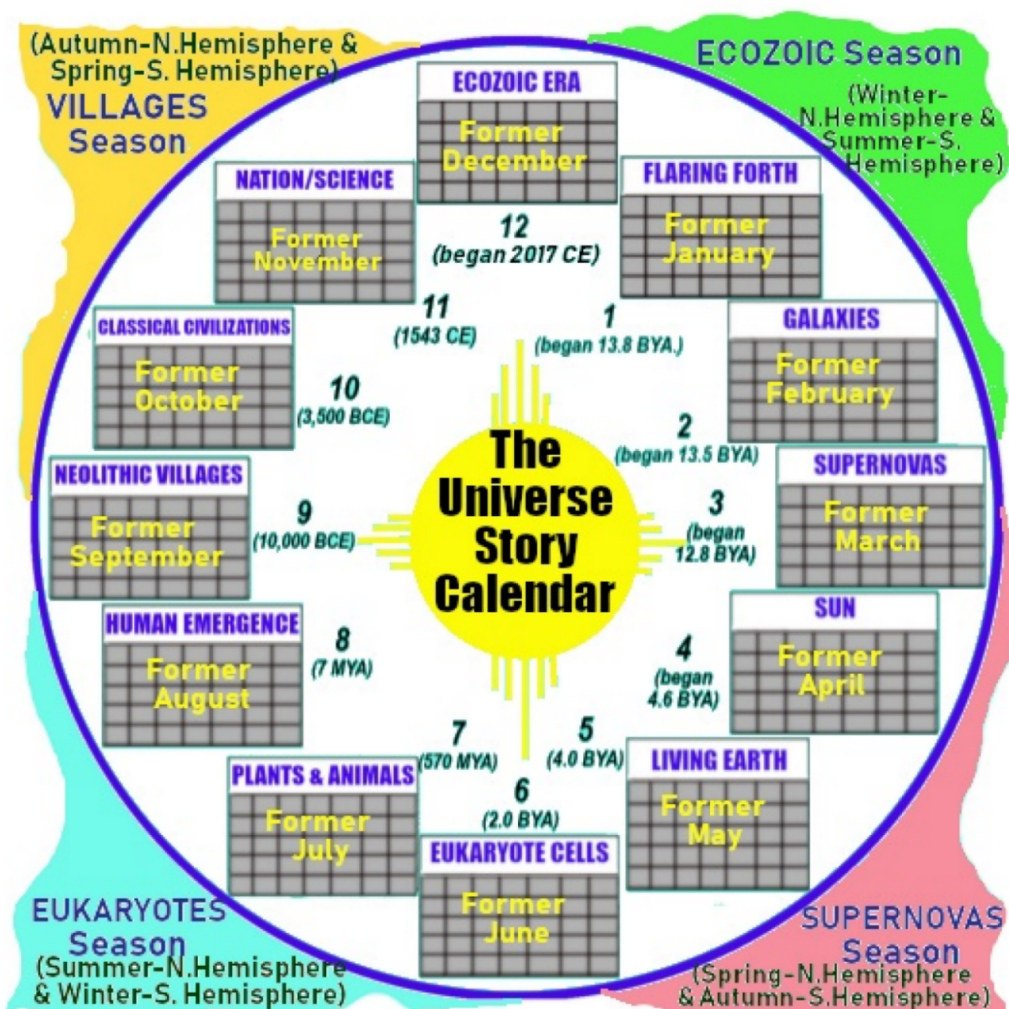

Additions: This sixth full year of TUSC (2017-23ce) tells the new story of the Universe and how each individual human being alive today can participate in the "Great Turning @round!" through following the new days, weeks, and months of the year. Below are key issues on our Garden planet of the Universe:

- A "**Great Turning @round!**" section on each month's explanation page to encourage you to apply the calendar to your daily lives.
- An "**OVERSHOOT**" section each month again this year to challenge you to explore the shift from the global climate crisis being a "solution" based problem to be solved to a "predicament" to be approached by facing the future wisely through deep adaptation.
- **Moon & Sun Times** each month in Yellow honoring endangered Island community's.

The original book, *The Universe Story Calendar*, this 2023ce calendar, the TUSC blog, and much more is available for download for free at www.TheUniverseStoryCalendar.org. The Universe Story Calendar Initiative is a donation driven educational tool for each individual human being to know and tell our new Story of the Universe only our generation has had in this detail! *With the joy of deep adaptation! Thomas, Pierre, and Pegasus*

TUSCalendar "Circle Around The Sun" Birthdays/Anniversaries Celebration Wheel

Reason for Celebration Wheel: To celebrate one complete "Circle Around the Sun" for Earth and Humans each 365 days—a year since their last anniversary.

INSTRUCTIONS:

- Find the date of your Birthday/Anniversary in the 2020 CE TUSCalendar. Read aloud all the information in your date's box. Ex. Tues, Jan. 3 would now be Earthday, FlaringForth 3.
- Now, turn to TUSC Birthday/Anniversary Wheel page. Find your spot on the Wheel. Say out loud your Birthday in TUSC. Ex. Moonday, Eukaryotes 5.
- Then, say out loud what new TUSC Season your Birthday/Anniversary is in. Ex. Supernovas Season. (In an Earth-based Calendar this Season would be either Spring or Autumn) Turn back to your Birthday page in TUSC. Read aloud the "Seasons Explanation".
- Finally, slowly trace your finger around TUSC Wheel from your date as many times as your age or anniversary telling The Universe Story by sharing each month's name. Ex. If your Birthday is Universeday, FlaringForth 31 say "FlaringForth" then "Galaxies"all the way to "Ecozoic."
- Repeat this for each person present. Be creative and make up other ritual games.

Our New, Essential
 World Calendar (2017-2023 CE)
 transcends, includes and accurately updates
 the former Roman Gregorian Calendar
 (of 1582 to 2017 CE) to tell our
 NEW STORY OF THE UNIVERSE

2023 CE is the
 Year of the Great
 Turning @round.

16-Month Calendar

THE UNIVERSE STORY CALENDAR INITIATIVE

"We have exploded beyond the fossilized knowledge of the Gregorian calendar... This [new] knowledge of the Universe and Life needs to suffuse all of our cultural constructs, including in a fundamental way, the calendars of every culture."

From Brian Thomas Swimme's Foreword to The Universe Story Calendar book

Why is there a Sunday every week, but not an Earthday every week?
 "... or a Universeday weekly? Or a Humanityday weekly? The floodgates are now open. The pieces of the puzzle [are] fitting together."

*From The Universe Story Calendar book; pg. 28, Chapter One:
 "Finally, after 2770 Years, an Earthday Each Week!"*
